

Pilot.People

Connect with people anywhere

Pilot. People helps:

Track the location of people

- Employees inside offices, factories, warehouses;
- Farmers in the fields;
- Patients in hospitals;
- Couriers in the city;
- Shoppers in malls;
- Workers in mines;
- Guests in hotels.

Track the location of people

Compile optimal routes for the movement of employees to solve work tasks. Take into account the cost of using a vehicle per 1 kilometer, the distance of destinations from the starting point of the trip, permitted and prohibited geofences for movement, time windows, working hours and many other parameters.

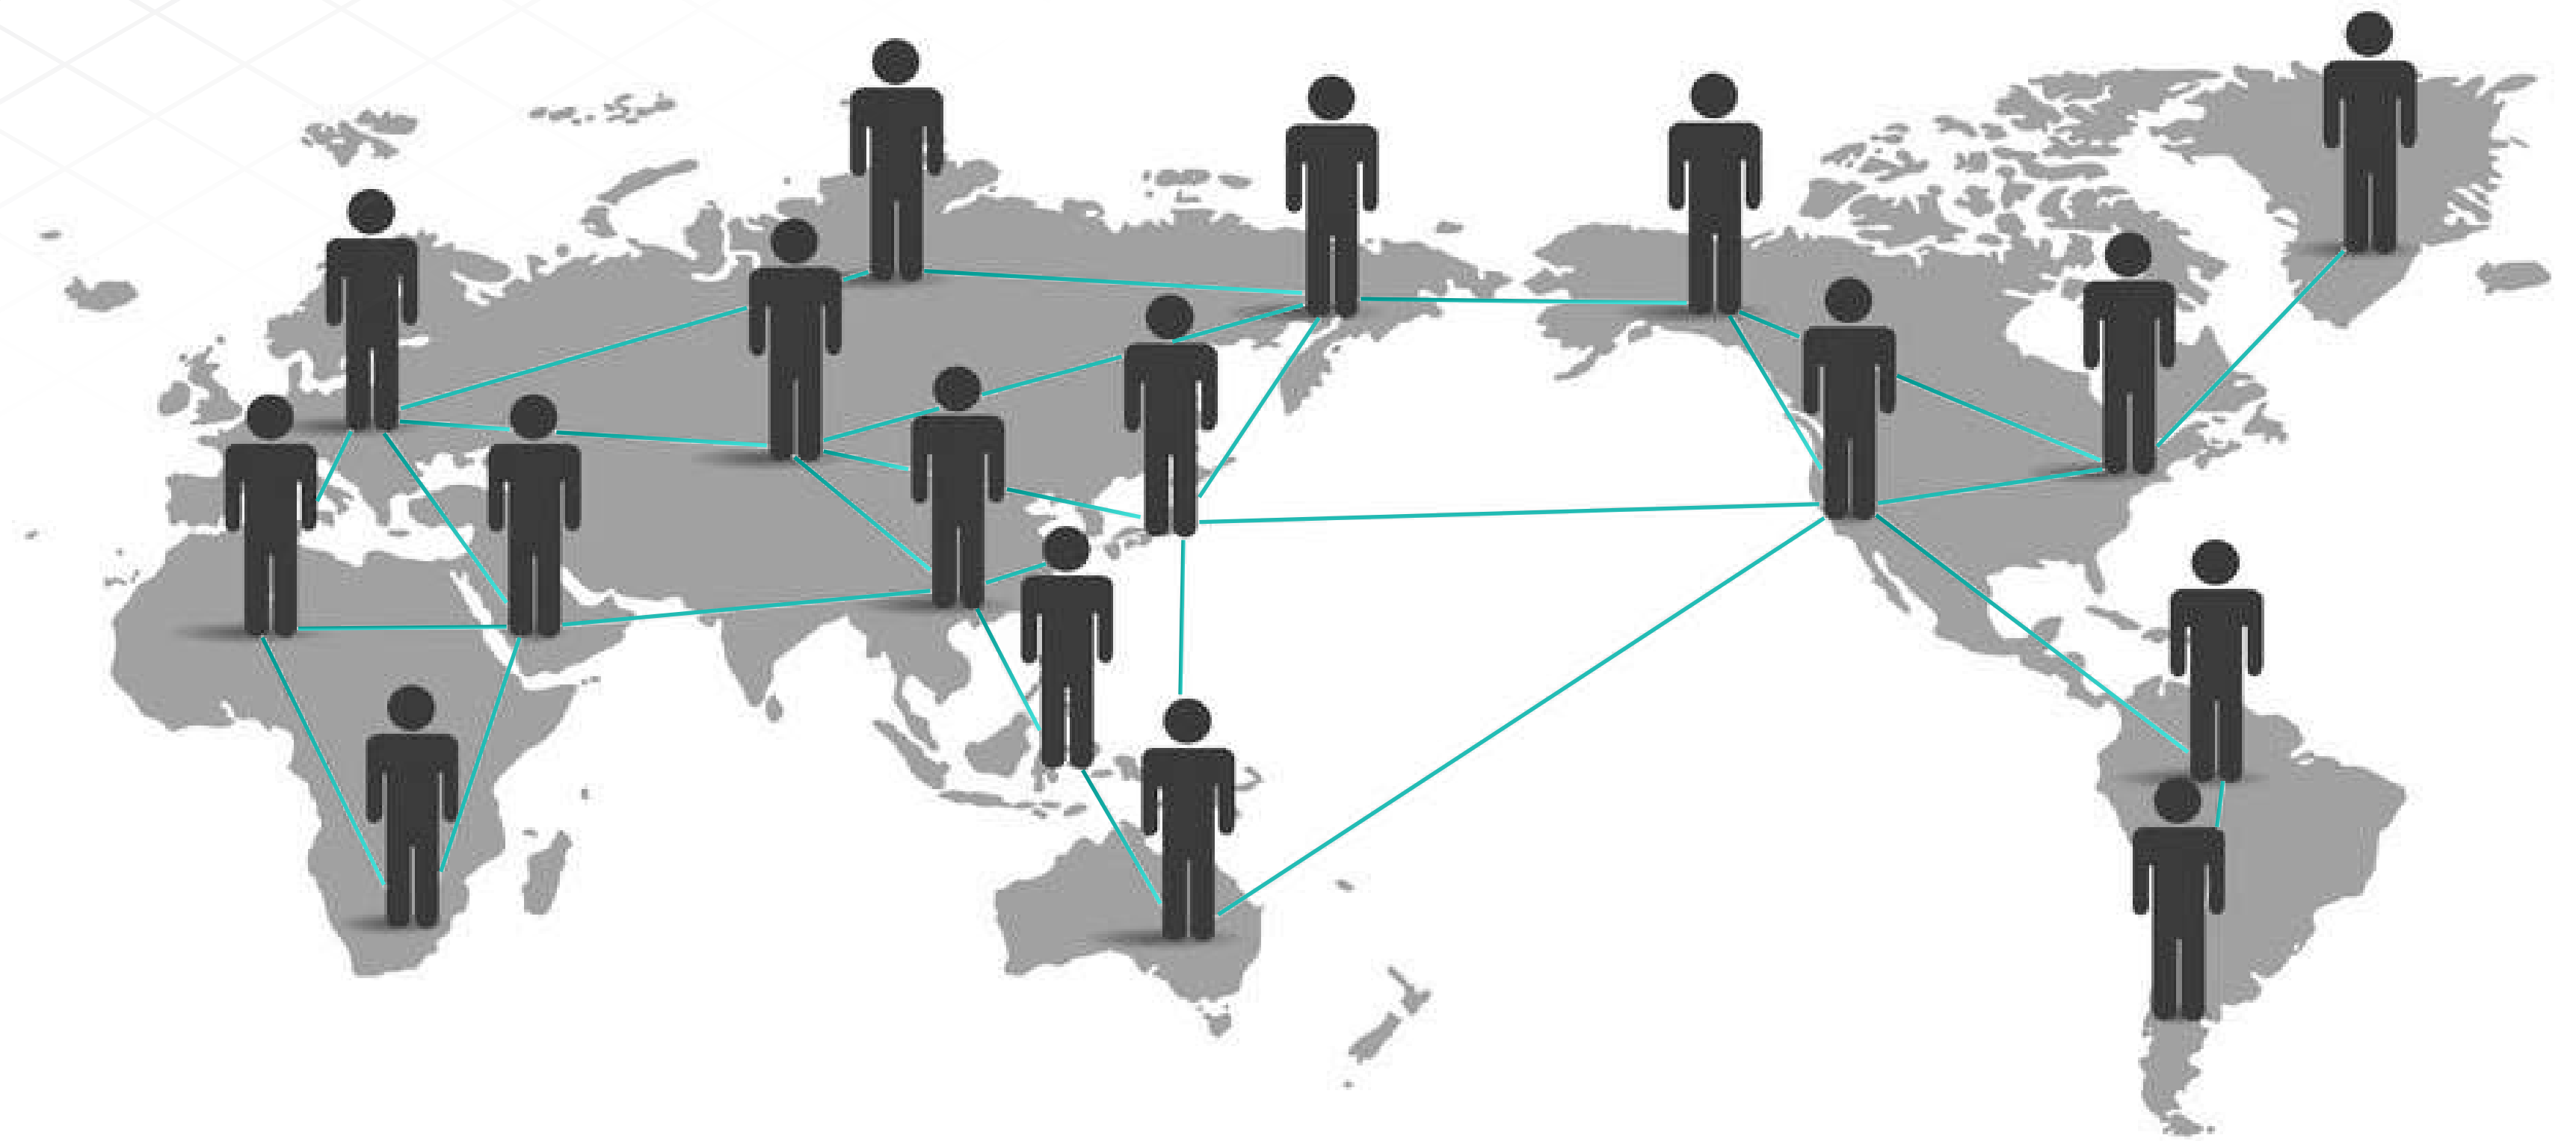

The application on the employee's smartphone allows

See the sequence of addresses, contact customers and/or recipients of orders, promptly report on the completed task, attach photos and receive the customer's signature right on the application screen, if this is provided for by the company's business processes.

Control the process

Generate reports on the process and results of the movement of employees in any aspect of information.
Have a sequence of actions in the event of an emergency.

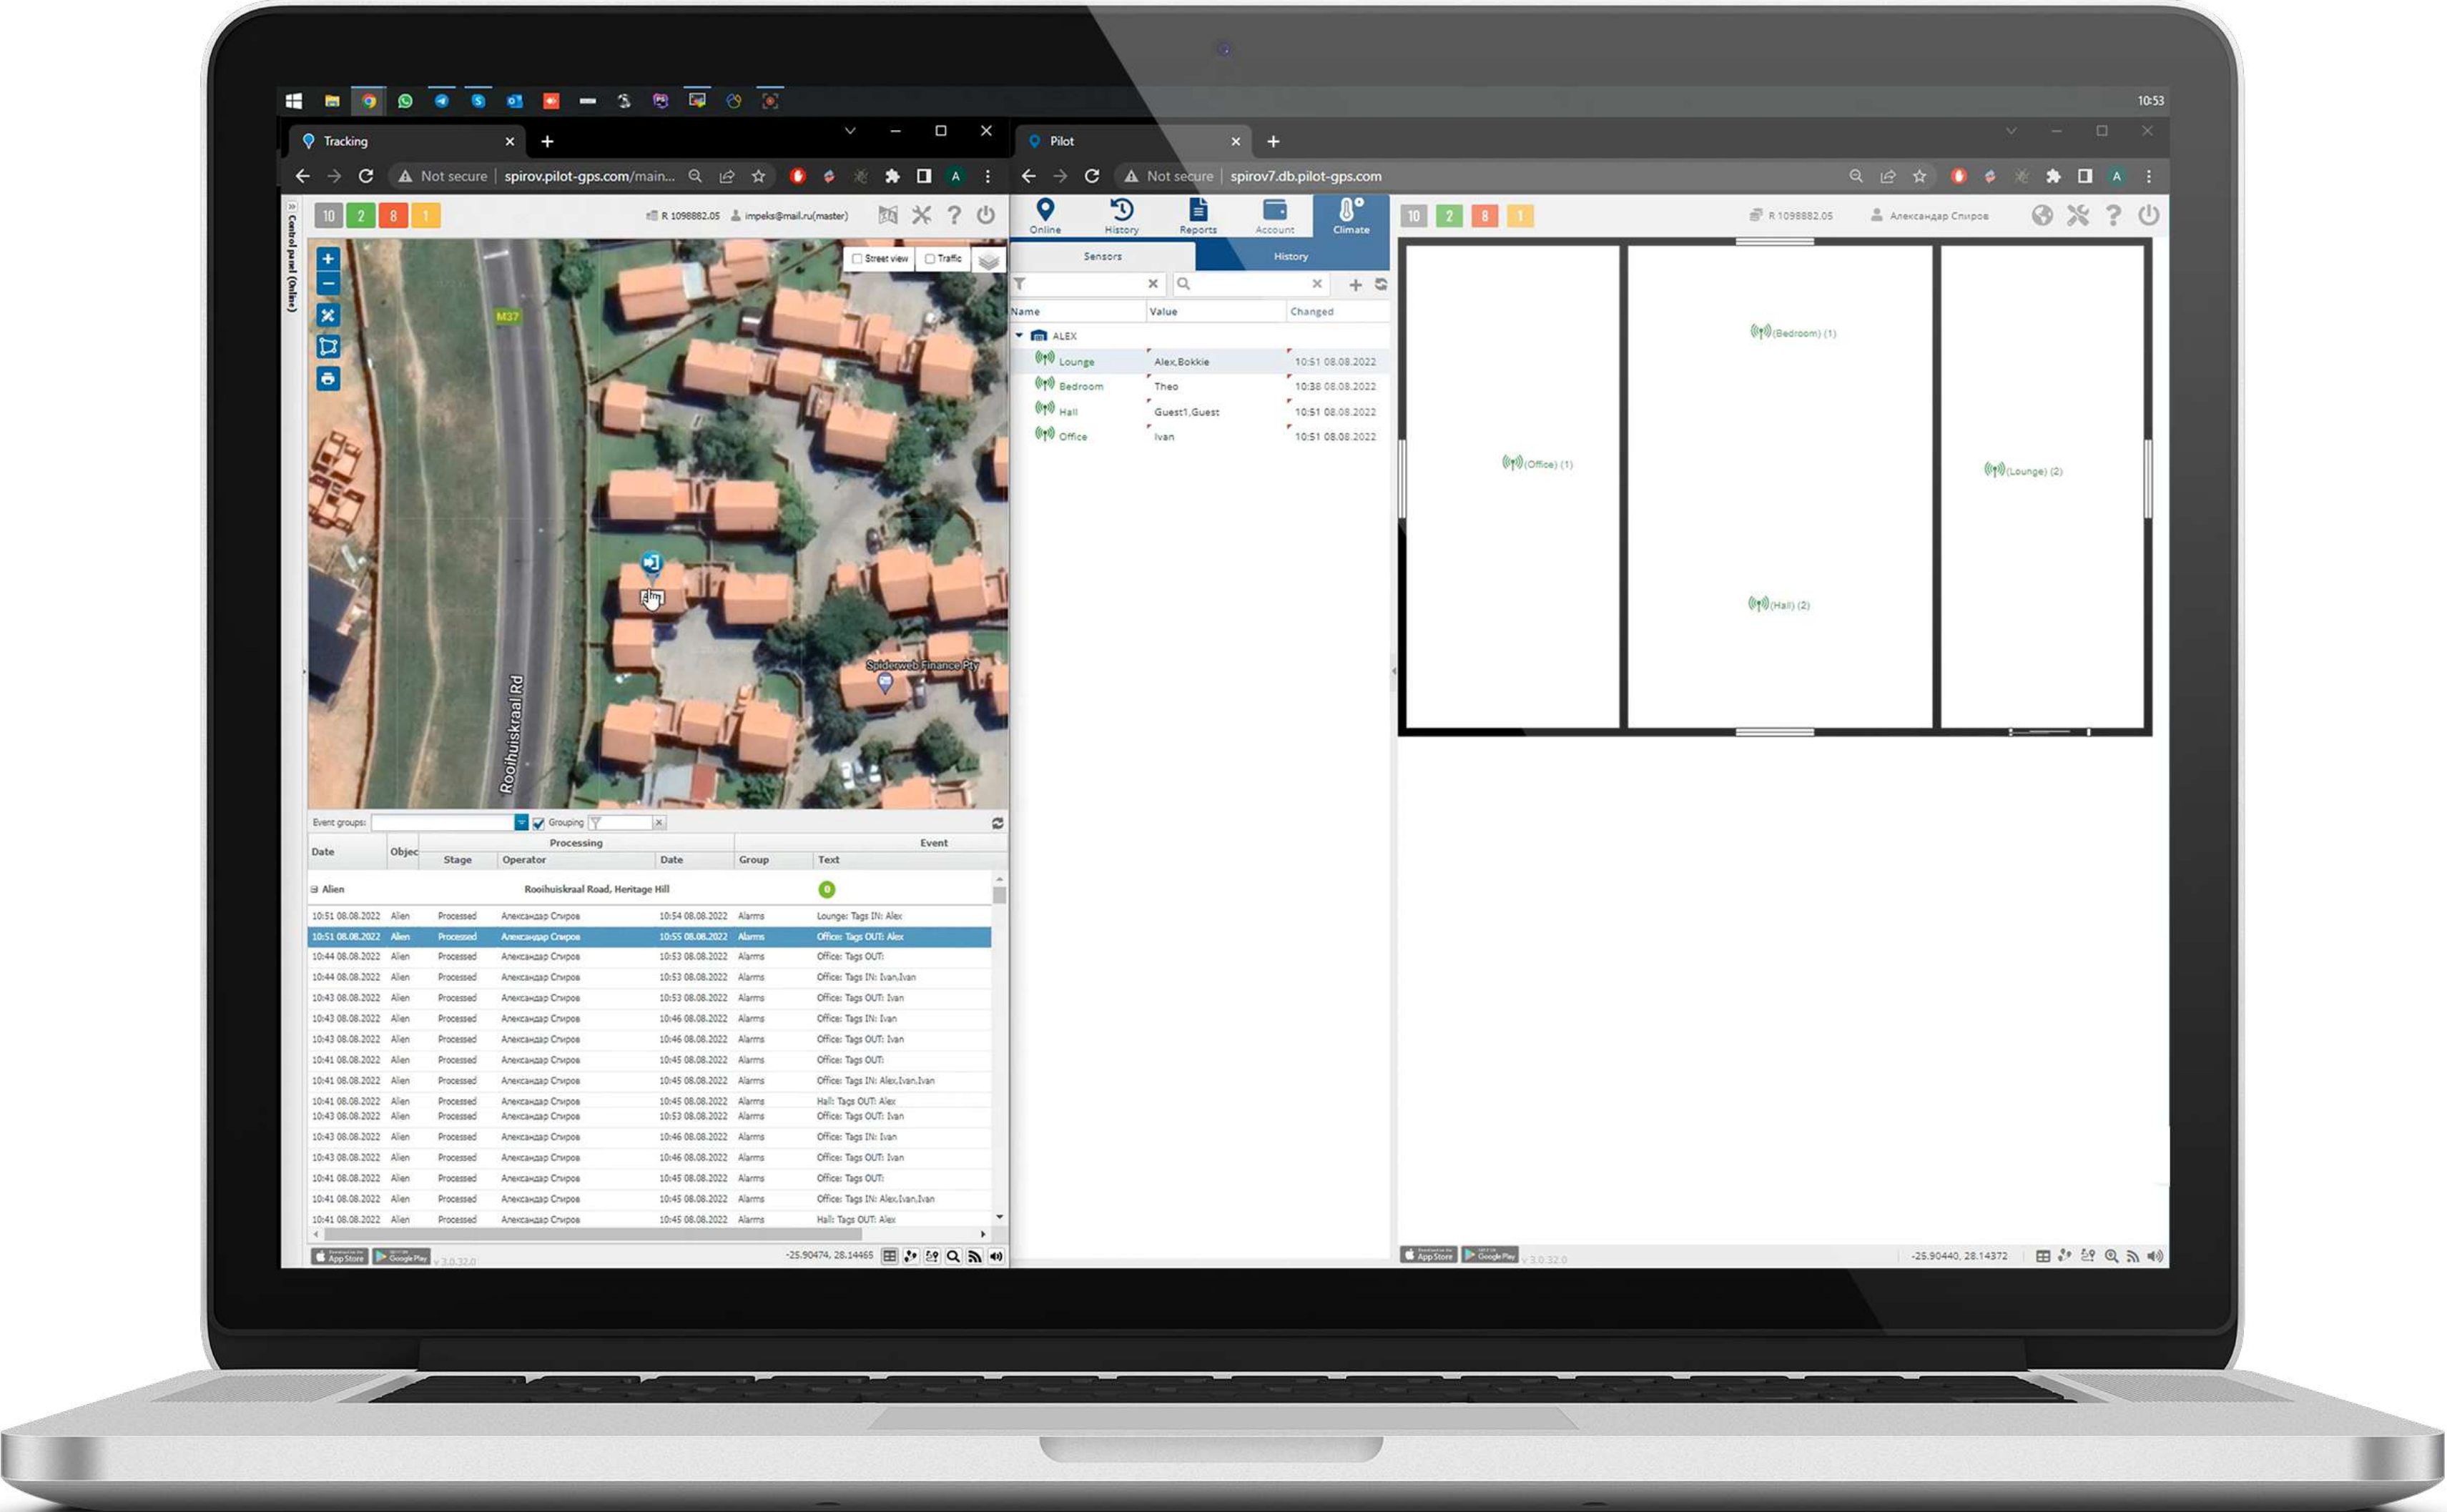

The product consists of

- Pilot platform;
- Sensors of any manufacturers for outdoor monitoring;
- Sensors for indoor monitoring of companies;
- [MOKO Smart](#);
