

Pilot.Video

Indoor and outdoor monitoring of commercial and private facilities

Pilot. Video helps to organize:

1 Control perimeter

The video surveillance system helps to monitor the perimeter of industrial sites, warehouses, farms, cell towers, airports, courtyards, residential buildings and other facilities.

3 Indoor monitoring

Offices, shops, shopping centers, laboratories, schools, kindergartens, exhibitions. Video intercoms in apartments and residential buildings help to see who came and watch the history of video recordings

5 Commercial monitoring

Smart cameras will help to calculate the throughput of retail outlets. Heat maps show in which places in the store customers spend the most time and which malls they walk in, how to create a more efficient work schedule for staff.

2 Video surveillance in transport

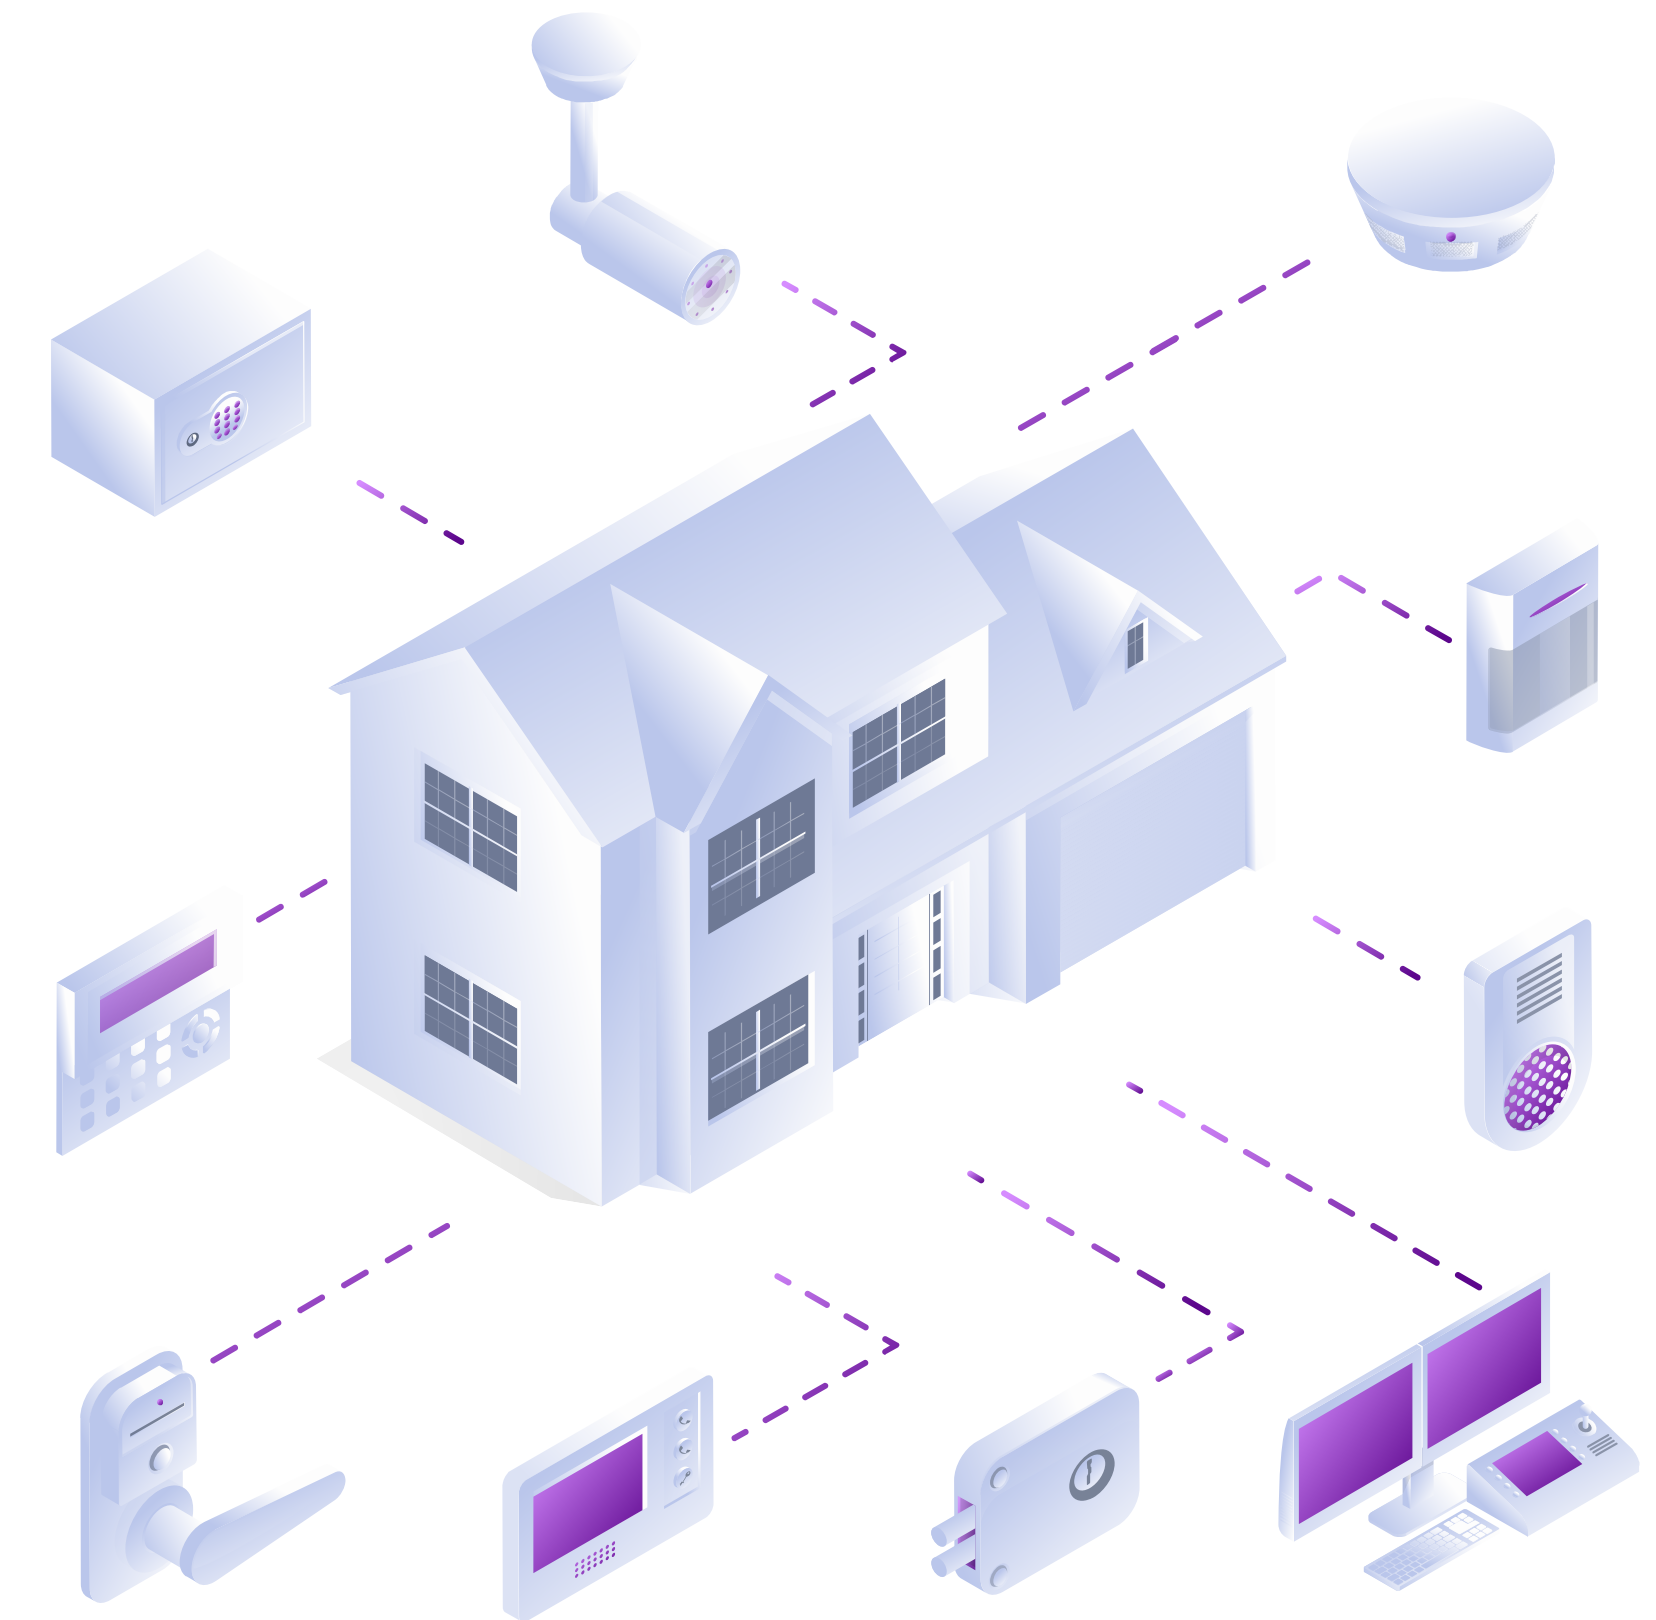

Online monitoring or recording of the situation in the cabin of a bus, train, metro, fixed-route taxi, at a bus stop, in the cab of a public transport or truck driver, in the back, outside the fuel tank.

4 Outdoor monitoring

Street video surveillance of roads, in public places, allows you to monitor the traffic situation, traffic flows, weather, natural disasters and other socially significant phenomena in real time.

6 Organization of the work of the warehouse, industrial sites

Smart video cameras with a car number recognition system control the entry and exit of vehicles by number, weight from a warehouse, industrial site. Record video archives of information, create and export various reports

Ease of use

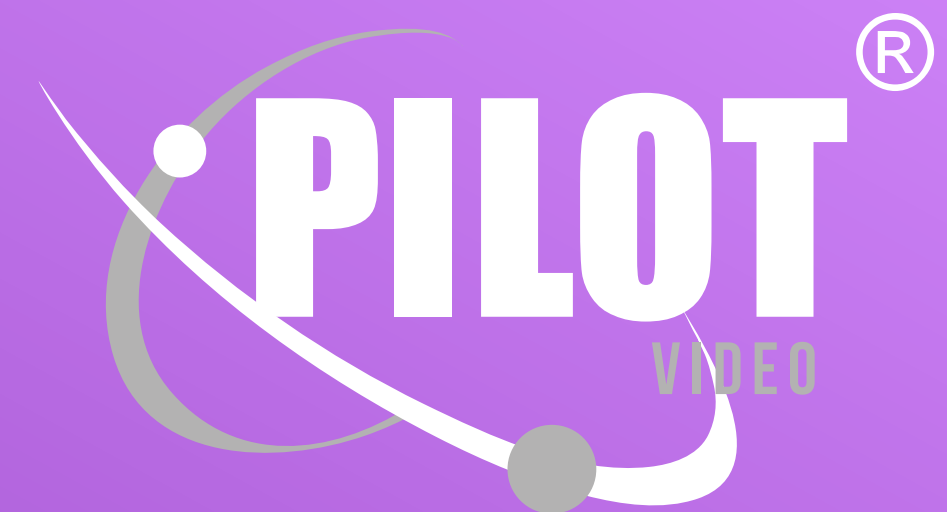

- Resolution of disputes and investigation of violations;
- Improving the quality of customer service and increasing value for them;
- More efficient use of resources;
- Increasing productivity, reducing manual labor;
- Reduction of potential illegal actions;
- Making decisions based on data;
- Increasing business profitability.

The product consists of:

- IP video cameras - security video surveillance cameras with built-in video signal output system on the Internet;
- Video cameras CCTV (Closed Circuit Television) closed circuit television systems;
- Pilot platforms;
- Registrars;
- Recorders;
- Monitors;
- Cables

For whom?

- Shopping centers, shops, offices;
- Production sites;
- Industrial enterprises;
- Transport companies;
- Management companies;
- Farms;
- Warehouse complexes;
- Schools, kindergartens;
- Laboratories;
- Airports
